

# WOODSIDE™

## High-load Crop Oil Concentrate

- CHS Woodside is a highly concentrated blend of emulsifiers and methylated seed oil. The product is designed for use with a broad range of herbicides where a high surfactant oil concentrate adjuvant is recommended or allowed. High surfactant oil concentrates allow lower use rates than standard oil adjuvants.
- CHS Woodside increases contact activity and penetration of the spray, while also providing uniform coverage on leaf surfaces.
  - Typical use rates will be 0.5-1% v/v (2-4 quarts per 100 gallons of water) or 0.25-0.5% v/v (1-2 quarts per 100 gallons of water)
  - Package Size:
    - 2x2.5 gallon case

**Always Read All Pesticide and Adjuvant Labels Prior to Use**
